

Profile Summary

With over 2 years of experience as a Full Stack PHP/Laravel Developer, I have a proven track record in developing high-quality and maintainable software applications. My technical proficiency in PHP, Laravel, JavaScript, and MySQL, coupled with my problem-solving skills and team collaboration abilities, strong understanding of Laravel architecture, Eloquent ORM, caching, API authentication, and performance optimization in agile development environments.

Professional Skill

- PHP
- JavaScript
- REST API
- ORM
- OOP
- Redis
- Git
- React
- Laravel
- HTML
- CSS
- Tailwind
- Bootstrap
- SQL
- Github
- Vue Js

Education

BSc in Computer Science & Engineering

2022-2026

Green University of Bangladesh

Work Experience

Full Stack PHP/Laravel Developer • WIN WIIN Service Provider

10/2024-PRESENT

- Designed and implemented new backend modules using Laravel with optimized architecture.
- Improved API performance by reducing N+1 queries and applying eager loading.
- Utilized Redis for caching to reduce repeated database calls and improve response speed.
- Collaborated in an agile environment; contributed to system design decisions.

Junior Web Developer • WIN WIIN Service Provider

09/2023 - 09/2024

- Worked on developing cutting-edge innovations like ecommerce application.
- Collaborated with the Instructional Design team to create innovative learning experiences, improving user engagement.
- Built and maintained backend features using Laravel, focusing on clean code principles.
- Implemented Redis caching, optimized SQL queries, and created reusable components.
- Contributed to RESTful API development for internal and client-focused systems.

Projects

Lake Valley Flower City - Real State Application

- Developed a comprehensive real estate management system covering plot listing, plot mapping, sales, and ownership transfers.
- Implemented end-to-end plot sale workflows, including client onboarding, share sales, and transaction tracking.
- Designed payment modules to handle client payments, installment plans, and complete payment history.
- Ensured accurate record-keeping and data consistency for plot holders and sales operations.
- Improved operational efficiency by digitizing manual real estate processes.

Account Software Application

- Built a full-featured accounting application with modules for HR, expenses, income, assets, and salary management.
- Implemented custom invoice generation and management for flexible billing requirements.
- Developed CRUD operations for multiple accounting entities with a focus on data integrity.
- Streamlined financial tracking and reporting across different business departments.

Projects

Ufeel Care App

- Developed an e-commerce application focused on cosmetics, skincare, and haircare products.
- Implemented product listing, category management, and user-friendly browsing experience.
- Integrated shopping cart, order management, and secure checkout functionality.
- Focused on a responsive and intuitive UI tailored for beauty and personal care customers.
- Supported business growth by enabling online sales and customer engagement.

Original Pizza Canada

- Created a web application for a pizza restaurant to manage online orders and menu listings.
- Implemented real-time order placement and order status tracking.
- Designed a responsive UI for seamless usage across desktop and mobile devices.
- Improved customer experience by enabling easy online ordering and faster service.
- Supported restaurant operations with efficient order management features.

Unexcart API-Based ERP Solution

- Developed an API-driven ERP solution to manage core business operations.
- Designed and integrated RESTful APIs for seamless communication between modules.
- Implemented scalable backend architecture to support multiple business workflows.
- Ensured secure data handling and optimized API performance.
- Enabled system flexibility for integration with third-party applications

BDeshi-Explorer

- Built a dynamic web app using Vue.js to explore and present geospatial content with interactive UI.
- Implemented modular frontend components for efficient routing and state management.
- Optimized performance for responsive browsing across devices.
- Integrated third-party APIs for real-time data visualization.

Product Inventory Microservice

- Designed a Vue + backend microservice architecture for managing inventory operations.
- Built RESTful endpoints for product CRUD and stock tracking.
- Implemented user role controls and secure data flow across modules.
- Improved modularity and scalability by separating microservice logic.

Strenghts

Problem Solving

Possess strong problem solving skill, demonstrated by providing out of the box soultions to project challanges And improving project delivery time.

Technical Proficiency

Highly proficient in PHP, Laravel, JavaScript, HTML, CSS, REST, MVC frameworks, and Git, demonstrated by successful project implementations.

Team Collaboration

Excellent team player, demonstrated by successful collaborations with product management & design teams.
